

Torridon
Primary School

Reading

We are beginning our year 3 Destination Reader journey and to help us with this we will be focussing on learning behaviours and skills including prediction, clarifying, inferring, summarising and questioning.

Writing

Our core text this half term will be Roald Dahl's *The BFG*. This exciting book will inspire children to write character descriptions, recipes, invitations, additions to a story and diary entries. We will explore the use of language

Mathematics

This half term children will be securing their understanding of the four operations (addition, subtraction, multiplication and division), whilst simultaneously applying these core skills to a range of reasoning and problem solving challenges.

Meet the Team!

Teaching Staff: Emma, Carmen, Vivian

Support Staff:

Azena, Patricia, Kirsty, Lucie, Vicky

Dreams and Curiosity

Supporting Your Child's Learning at Home

Reading is the most important activity we can do at home with our children. Please spend time reading to and with your child, and listening to them read. We ask that Reading Records are completed daily.

Mathematics challenges will also be set weekly, and hard copies of maths home learning will be sent out along with spelling lists for pupils to practise.

Year Three

Autumn 2 2019

Science

This term we will be studying plants. Pupils will observe, investigate and experiment using a range of resources, writing up their findings using scientific vocabulary.

We will be investigating ways in which water is transported through a plant and what plants need to survive.

History

In their topic lessons, children will be studying History this half term. They will learn all about the ancient Egyptians and their remarkable achievements. They will handle ancient artefacts as well as carrying out the mummification process on vegetables!

Enrichment

As part of our history learning, we will be visiting the Horniman Museum to find out more about Ancient Egypt. We will be taking part in an object handling session, where children will get to investigate real-life Egyptian artefacts - including a mummified bird!
